Art Unit: 2622

1. It should be noted that the Terminal Disclaimer filed on 5/9/05 has been approved.

2. The allowance of claims 70-75 and 77-82 has been withdrawn due new grounds of rejection. The examiner regrets any inconvenience to Applicants.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 70-83 are provisionally rejected on the ground of nonstatutory double patenting over claims 8, 9 and 13 of

compending Application No. 09/894,233. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced compending application and would be covered by any patent granted on that compending application since the referenced compending application and the instant application are claiming common subject matter, as follows:

With regard to claims 70, 71, 72 and 76, claims 70-72 are obvious variant and encompassed by claims 8, 9 and 13 of the US application'233. It is noted that claimed "display" is inherently included in the managing step of the application'233 since in order to control panning, tilting and zooming, and identify other users of a camera through network, users must have a display device so as to control panning, tilting and zooming functions.

With regard to claims 73 and 74, claimed "a predetermined period of time" is inherently included in claim 8 of the application'233 since each user has a limitation of using the camera; in other words, each user inherently has a predetermined period of time.

Method claims 77-82 correspond to apparatus claims 70-74 and 76 and are analyzed the same as previously discussed with respect apparatus claims 70-74.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

5. Claims 75 and 83 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. This Office action is not made Final due to new grounds of rejections.
